X-40IW | Quick-Start Guide

Basic Setup Steps

1. Power the module and connect via ethernet to a computer.
2. Set IP address on computer to the same network as module. (Ex: 192.168.1.50) *Note: restore computer settings after setup.*
3. To configure module, open web browser and enter:
   `http://192.168.1.2/setup.html`
4. In General Settings under WiFi, enter the WiFi settings.
5. Assign the module a permanent IP address or enable DHCP.
6. Restart the module for the settings to take effect.
